Infos paramétrage:

- Pour installer le SASW5 il a deux options : soit via l'application, soit via la télécommande.
○ Via l'app > il suffit d'ajouter la barre de son à l'app et faire ajouter un caisson et faire la calibration mais c'est tout (c'est censé être la méthode la plus simple) - Attention à utiliser un partage de connexion et non le wifi du magasin sinon ça ne fonctionnera pas.
○ Via la télécommande c'est censé être la solution de secours > les équipes terrain ont reçu quelques informations qu'apparemment vous êtes censés avoir sur comment installer une démo :

Setup info

-There are two options for setting up the SASW5: either via the app or via the remote control

oVia the app > just add the sound bar to the app, add a box and do the calibration, but that's it (it's supposed to be the simplest method) - make sure you use a shared connection and not the shop's wifi, otherwise it won't work.

oVia the remote control it's supposed to be the back-up solution > the field teams have been given some information that apparently you're supposed to have on how to install a demo

Step 4: Set up Demo Mode

Enter Demo mode and set the following configurations. Pay special attention to the subwoofer and rear speaker output settings. See the next page for detailed explanations.

Demo Mode In

Enter Demo Mode of Soundbar

- Turn on the bar
- Press [DEMO MODE] while pressing [SHIFT]
  → When successful, Main LED stays lit in purple for two seconds

① [SHIFT] + [YT]
② [SHIFT] + [PREV]
③ [SHIFT] + [INPUT]
④ [SHIFT] + [+]/[-]

Setting

Please change the the defaults to the appropriate settings.

IMPORTANT: Set individual settings (order doesn't matter)

- Press [SHIFT] + [YT]   : Subwoofer output (ON, OFF) — Default
- Press [SHIFT] + [PREV]   : Rear speakers output (ON, OFF) — Default
- Press [SHIFT] + [INPUT]   : Input select (TV, HDMI) — Default
- Press [SHIFT] + [+]/[-] : Volume (70) — Default

Registration

Save the changed parameters of Soundbar on Demo Mode

- Press [DEMO MODE] while pressing [SHIFT]
  → When successful, Main LED stays lit in purple for two seconds

IMPORTANT: Change Optional Speakers Output state

Standalone (Needed)	Wireless (Needed)	Wired (Needed)

When you do not have a subwoofer or rear speakers connected, **you must change the setting from the default.**
If the setting is not made, the sound will not be as expected.

Default Setting of Soundbar

Subwoofer output	Rear Speakers output
ON	**ON**

SW / Rear output ON→OFF

Sub LED blinks in white twice

SW / Rear output OFF→ON

Sub LED stays lit in white for a second

4. Full Surround Sound

SW output ON (You don't need to change)
Rear output ON (You don't need to change)

1. Standalone

**Press [SHIFT] + [YT]:
SW output ON→OFF**

**Press [SHIFT] + [PREV]:
Rear output ON→OFF**

2. Bar + Rear Speaker

**Press [SHIFT] + [YT]:
SW output ON→OFF**

Rear output ON
(You don't need to change)

3. Bar + Sub Woofer

SW output ON
(You don't need to change)

**Press [SHIFT] + [PREV]:
Rear output ON→OFF**

Pour installer la Bar 9 avec la TV il faut :

1. Brancher le câble d'alimentation de la barre à une prise
2. Connecter le câble HDMI eARC de la barre de son à l'entrée spécifique HDMI eARC de la TV
3. Relier le câble Jack de la barre de son à la TV
4. Installer la démo de la barre de son (vous avez normalement le process) -> encore une fois il est préférable d'utiliser l'application mobile et sinon voir le tuto avec la télécommande mais plus complexe, je pourrai te le partager plus tard si besoin.

To install Bar 9 with your TV, you need to :

1.Connect the Bar's power cable to a power socket.

2.Connect the HDMI eARC cable from the soundbar to the specific HDMI eARC input on the TV

3.Connect the Jack cable from the soundbar to the TV

4.Install the soundbar demo (you normally have the process) -> once again it's best to use the mobile app and if not see the tutorial with the remote control but it's more complex, I can share it with you later if you need.
