

Sony Large 20 — Screen Set Up

Press 'Change Server' on the above screen. If asked for a pass code type '7669' and press enter

Press 'Show All'

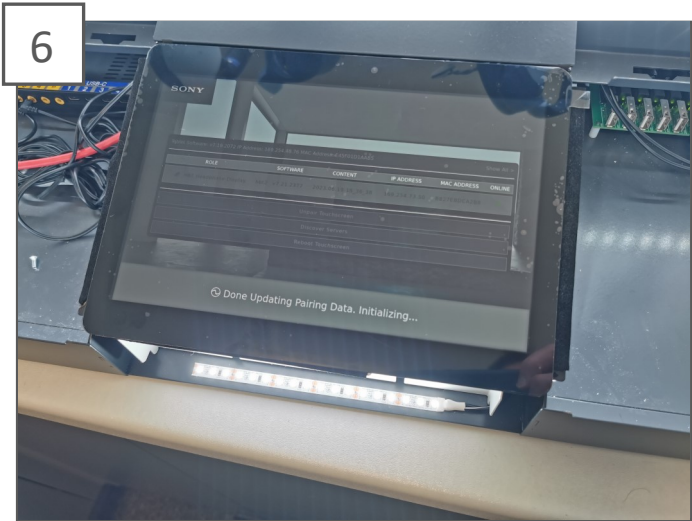

Select 'Role' at the top of the screen.

Press 'HBT Headphone Display' and it should highlight in grey.

Press 'Hide Offline'

The screen should change to show the above with 'Done Updating Data Pairing Initializing' across the bottom.

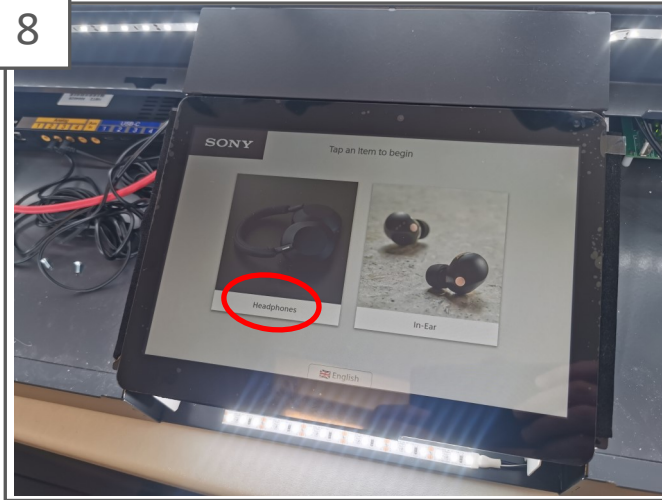

Sony Large 20 — Screen Set Up

7

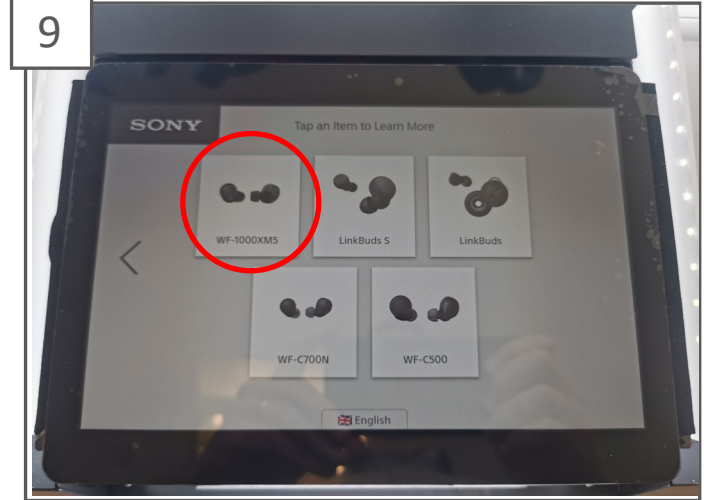

If you don't see the previous screen press 'Show All' again and then select 'Software' and 'Content' and make sure the 'HBT Headphone Display' is highlighted for both.

8

After approximately 3 minutes the content should load and then you can select 'Headphones' to test the audio plays on the headphones.

9

Test the correct content has been uploaded, select 'In Ear' and check the WF-1000XM5 product is listed. If not the content will need to be updated using the USB stick.

Sony Large 20 — Screen Set Up

Re-fit the screws through the bracket into the feet of the new speaker.

Fit the XG300 bracket onto the unit ensuring the two pins on the underside locate in the holes in the top plate.

Slide the speaker forwards to lock it in place.

Re-fit the two screws at the rear of the speaker to prevent it from being slide back.

Re-connect the power lead.

Re-connect the unit to the power and wait 10mins for the content to load.
